

 **Adolescent Medicine**  Version 1.0  Specialists in the specialty below must also request Pediatrics privileges.  Scope

 **P390686:** The scope of privileges in Adolescent Medicine includes the evaluation, diagnosis, treatment and consultation for patients from birth to young adulthood concerning their physical, emotional, and social health as well as treating acute and chronic disease, including major complicated illnesses. Privileges may also include providing care to patients with complex adolescent conditions, including growth and maturational disorders, gynecological and obstetrical conditions, severe behavioral disturbances and substance abuse issues. Physicians may admit to the facility and may provide care to patients in the intensive care setting in accordance with medical staff policies. In addition, privileges also include the ability to assess, stabilize, and determine the disposition of patients with emergent conditions in accordance with medical staff policy.

  Diagnosis and Management (D&M):  Procedures:  Procedures Advanced Privileges (Requires Additional Training):  Other (Facility- or provider-specific privileges only):
