

 **Endocrinology**  Version 1.0  Physicians requesting privileges in this subspecialty must also request Internal Medicine privileges.  Scope

 **P388200:** The scope of privileges in endocrinology, diabetes, and metabolism includes the evaluation, diagnosis, treatment, and provision of consultation to patients (including critically ill patients) with injuries or disorders of the endocrine glands (e.g., thyroid and adrenal glands), metabolic and nutritional disorders, diabetes in pregnancy or gestational disorders, pituitary diseases, and menstrual and gonadal problems. Privileges include the performance of history and physical exams. Practitioners may admit and may provide care to patients in the intensive care setting in accordance with MTF policies. Specialists in endocrinology, diabetes, and metabolism assess, stabilize, and determine disposition of patients with emergent conditions in accordance with medical staff policy.

  Diagnosis and Management (D&M):

 **P388202:** Performance and interpretation of static and dynamic (stimulation and suppression) endocrine function tests

 **P388204:** Management of hormone delivery systems, including continuous subcutaneous insulin infusion via insulin pump

 **P388206:** Interpretation of bone mineral density measurements

  Procedures:

 **P388208:** Fine needle thyroid biopsy

  Other (Facility- or provider-specific privileges only):
