

Orthopedic Surgery
 Version 1.0

 Scope

P384294: The scope of privileges in orthopedic surgery includes the evaluation, diagnosis, treatment and consultation for patients of all ages to correct or treat various conditions, illnesses, and injuries of the extremities, spine, and associated structures by medical, surgical, and physical means. Such conditions include, but are not limited to, trauma, infections, tumors, metabolic disturbances of the musculoskeletal system; deformities, injuries, fractures, and degenerative diseases of the musculoskeletal system; primary and secondary muscular problems; and the effects of central or peripheral nervous system lesions on the musculoskeletal system. Orthopedic surgeons may admit to the facility and provide care to patients in the intensive care setting in accordance with MTF policies. They may also assess, stabilize, and determine the disposition of patients with emergent conditions consistent with medical staff policy.
