

2011 Hospital National Patient Safety Goals

The purpose of the National Patient Safety Goals is to improve patient safety. The goals focus on problems in health care safety and how to solve them.

Identify patients correctly

- NPSG.01.01.01 Use at least two ways to identify patients. For example, use the patient's name *and* date of birth. This is done to make sure that each patient gets the correct medicine and treatment.
- NPSG.01.03.01 Make sure that the correct patient gets the correct blood when they get a blood transfusion.

Improve staff communication

- NPSG.02.03.01 Get important test results to the right staff person on time.

Use medicines safely

- NPSG.03.04.01 Before a procedure, label medicines that are not labeled. For example, medicines in syringes, cups and basins. Do this in the area where medicines and supplies are set up.
- NPSG.03.05.01 Take extra care with patients who take medicines to thin their blood.

Prevent infection

- NPSG.07.01.01 Use the hand cleaning guidelines from the Centers for Disease Control and Prevention or the World Health Organization. Set goals for improving hand cleaning. Use the goals to improve hand cleaning.
- NPSG.07.03.01 Use proven guidelines to prevent infections that are difficult to treat.
- NPSG.07.04.01 Use proven guidelines to prevent infection of the blood from central lines.
- NPSG.07.05.01 Use proven guidelines to prevent infection after surgery.

Check patient medicines

- NPSG.08.01.01 Find out what medicines each patient is taking. Make sure that it is OK for the patient to take any new medicines with their current medicines.
- NPSG.08.02.01 Give a list of the patient's medicines to their next caregiver. Give the list to the patient's regular doctor before the patient goes home.
- NPSG.08.03.01 Give a list of the patient's medicines to the patient and their family before they go home. Explain the list.
- NPSG.08.04.01 Some patients may get medicine in small amounts or for a short time. Make sure that it is OK for those patients to take those medicines with their current medicines.

Identify patient safety risks

- NPSG.15.01.01 Find out which patients are most likely to try to commit suicide.

Prevent mistakes in surgery

- UP.01.01.01 Make sure that the correct surgery is done on the correct patient and at the correct place on the patient's body.
- UP.01.02.01 Mark the correct place on the patient's body where the surgery is to be done.
- UP.01.03.01 Pause before the surgery to make sure that a mistake is not being made.

This is an easy-to-read document. It has been created for the public. The exact language of the goals can be found at www.jointcommission.org.
